DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 and 9-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Gore et al (WO 99/26336; art cited by applicant).

Regarding claims 1-7 and 9-14, Gore, as shown in figures 5-20, teaches a method and apparatus for timing control configuration for mobile station to accommodate for different mobile radio standards comprising a system clock generator (30), clock divider (40) and event controller (50). See also page 17, line 16 to page 31, line 29.

Allowable Subject Matter

3. Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nakagawa et al (US 2002/0056014) is cited because it is pertinent to clock generation for different standards. However, the prior art of record fail to further teach or suggest the further arrangement of the fractional clock divider as recited in claim 8.
